### DETAILED ACTION

Claims 1-27 are pending in this application.

#### ***Restriction Requirement***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-12 and 18-21, drawn to a pharmaceutical composition, classified in class 424, subclass 401.

II. Claims 13-17, drawn to method of treating osteoarthritis, etc., classified in class 514, subclass 825.

III. Claims 22-26, drawn to method of producing an analgesic effect, classified in class 514, subclass 816.

IV. Claim 27, drawn to method of producing a fast onset of pain relief, classified in class 514, subclass 816.

The inventions are distinct, each from the other because:

Inventions I and II, III, IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process such as treatment of constipation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

***Conclusion***

Claims 1-27 are under restriction requirement.
